

1 OUT OF 5

WOMEN

1 out of 5 women will experience sexual assault during their college career but less than 10% will report.

SEXUAL ASSAULT RESPONSE TRAINING

HOW?

We have created an online interactive learning seminar, that includes animations, video content, and quizzes, using an HTML5 e-learning authoring tool that is integrated into the UGA PD's existing learning management system.

WHAT?

The Sexual Assault Response Training is an online training program that aims to train the University of Georgia's patrol officers in a trauma-informed way to ensure that survivors of sexual assault are supported and treated with empathy.

WHO?

We have collaborated with the School of Social Work to incorporate their course content into the online training platform for the UGA Police Department.

WHY?

By providing officers with an interactive training module, they will be engaged while building crisis intervention skills that would help build trust within a investigation.
